STATISTICS OF CITIES OF CANADA HAVING A POPULATION OF 10,000 AND OVER.

CONTENTS.

	PAGE
Preface.....	3
TABLE I.—Historical.....	5
Statistics showing Populations; Assessed Values of Taxable Property and Values of Exemption of Lands and Buildings for the Years 1901, 1911 and 1919.	
TABLE II.—General Statistics.....	6-11
Areas; Estimated Populations, 1919; Years of Incorporation; Governmental Organization; Assessed Value of Taxable Property; Assessment of Incomes for Municipal Income Tax; Assessment for Local Improvement; General Rate of Assessment on the Dollar; School Tax Rate; Value of Exemptions of Lands and Buildings classified; Streets improved and unimproved, mileage of; Sewers, mileage of; Sidewalks, mileage of; Parks and Playgrounds, number and acreage; Street Lighting, mileage of.	
TABLE III.—Waterworks and Purification Plants.....	12-15
Water Supply System:	
Source of supply; Year built or purchased; Value of system; Water supplied to system during the year; Daily consumption per capita; Water meters in use; Water metered during the year; Pressure, regular and fire; Reservoirs, number and capacity; Stand-pipes, number and capacity; Mains mileage of.	
Purification of Water System.....	13-15
Method employed; Daily capacity; Average quantity of water treated daily; Average cost per day.	
TABLE IV.—Fire and Police Department:—	
Fire Department.....	16-22
Employees; Halls or Stations; Hydrants; Horses; Pumping Engines; Chemical Engines; Hose Wagons; Aerial Ladders; Other Ladder Trucks and Ladders; Fire Boats; Hose Sleighs; Chemical Tanks; Water Towers; Automobiles and Other Conveyances; Hose, length of; Alarm Boxes; Estimated value of Equipment; Calls during the Year; Casualties; Causes of Fires; Methods of Extinguishing Fires; Loss on Property; Insurance on Property.	
Police Department.....	22-23
Constables on beat or mounted; Detectives, Sergeants and Total Staff; Horses, Bicycles and Motor cycles; Patrols, Ambulances and Automobiles.	
TABLE V.—Receipts.....	24-35
Compulsory Taxation classified; Licenses, Business, Dog and Other; Fees and Highway Privileges, including Building Permits, Electric Railway Companies, Electric Light and Power Companies, Telegraph and Telephone Companies and Gas Companies; Fines, Forfeits and Escheats; Sales, Rentals and Leases of Buildings and Lands; Municipally owned Public Services, including Street Railways, Waterworks system, Electric Light and Power, Gas System, Markets and Weigh Scales and Docks and Wharves; Education, including Grants and Subventions, Pupils' fees and School Taxes or Assessments; Pensions or Superannuation Assessments; Donations or Gifts for Benefit Funds; Libraries, Museums and Art Galleries; Sanitation and Promotion of Cleanliness; Fees from Hospitals and Institutions; Sinking Funds; Refunds; Interest; Miscellaneous and Other Receipts; Total Ordinary Receipts; Extraordinary Receipts, including General Debentures or Bonds, Special Debentures or Bonds, Interest and Total Extraordinary Receipts; Grand Total all Receipts.	
TABLE VI.—Expenditure.....	36-44
General Government, including Mayor and Council, All Other Civic Officials, Construction and Maintenance of Buildings, Elections and Other Expenditure; Education, including Public, Separate, Collegiate and Technical Schools, Libraries, Museums and Art Galleries; Health and Sanitation; Charities and Corrections; Fire and Police Departments; Municipally owned Public Services, including Waterworks, Gas, Electric Light and Power, Markets, Weigh Scales, Street Railways, Exhibitions and Other Services; Streets; Sidewalks; Parks, Playgrounds, Celebrations and Receptions; Sinking Funds; Interest; Refunds; Judgments and Litigation; Total Ordinary Expenditure; Extraordinary Expenditure, including General Debentures or Bonds, Special Debentures or Bonds, Overdrafts, Other Extraordinary and Total Extraordinary Expenditure; Grand Total all Expenditures.	
TABLE VII.—Assets (available).....	45
Cash on Hand at end of Year; Sinking Funds; Taxes in Arrears; Saleable Lands and Buildings; Other Debts Due; Total available Assets.	
TABLE VIII.—Liabilities.....	46
Bonded Debt; Floating Debt; All Other Liabilities; Total Liabilities.	

STATISTICS OF CITIES, 1919.

PREFACE.

For some time past there has been a growing demand from officials, financial corporations, economists and others interested in taxation and similar problems, for comparative statistics of the more important municipalities throughout Canada, more particularly statistics of municipal finance. Jurisdiction with regard to municipalities is vested in the Provincial Governments, and the first essential for comparative statistics is the adoption of a uniform system of municipal accounting and reporting. A memorandum outlining a system, and looking to co-operative action between the Dominion Bureau of Statistics and the Provincial Departments, was drawn up in the Bureau in 1918 and submitted to the Provinces. It was recognized, however, that the matter was complex and far reaching in scope, and that definite action would not be feasible without careful discussion of details, such as might take place at a conference of Dominion and Provincial officials.

Pending such discussion it was thought that a useful purpose might be served if a limited survey was undertaken by the Bureau on the lines suggested. A schedule was accordingly sent to urban centres having a population of 10,000 and over, and the present report is based on the replies received. The Bureau tenders its grateful thanks to the municipal officers, who, sometimes at considerable difficulty, in view of the diversified methods of accounting which prevail, filled in the schedules with the data asked for. Without such co-operation a statement, even of the present limited scope, would have been impossible, the usual annual statements not being available for co-ordinated results in view of the different significance attached to items in various localities.

Altogether, returns were received from fifty-three municipalities having a population of 10,000 and over. In a few cases, notably Guelph, Moncton and St. Catharines, the reports sent in were not sufficiently detailed to permit of co-ordination with others, whilst no returns were received from Chatham, Ontario, Shawinigan Falls, Quebec, and Glace Bay, Nova Scotia.

The matter covered in the report is grouped in a series of eight tables, the scheme of which will be noted in the analytical table of contents.

As above stated, the present report is regarded as tentative. The inquiry, however, is thought to have demonstrated the feasibility of procuring municipal statistics in general on a comparative scale when more definite plans have been matured. The experience already gained will permit additions to the schedules, particularly in reference to the classification of financial items. It is the intention of the Bureau to repeat the inquiry if its usefulness is demonstrated, and to embrace an increasing list of municipalities.

The report was prepared by Lt. Col. J. R. Munro as in charge of the Finance Division of the Bureau.

R. H. COATS,
Dominion Statistician.

MUNICIPAL STATISTICS

TABLE 1.—Historical.

Statistics of Cities and Towns of 10,000 and over showing population, total assessed value of taxable property, and total value of exemptions (land and buildings) for the years 1901, 1911 and 1919.

City.	Population			Total Assessed Value of Taxable Property.			Total Value of Exemptions (land and buildings).

CANADA
BUREAU FÉDÉRAL DE LA STATISTIQUE
DIVISION DES FINANCES

STATISTIQUES MUNICIPALES

CITÉS ET VILLES DE 10,000 HABITANTS ET PLUS.

OTTAWA
THOMAS MULVEY
IMPRIMEUR DE SA TRÈS EXCELLENTE MAJESTÉ LE ROI
1920

[No 17—1921.]

STATISTIQUES URBAINES, 1919.

PRÉFACE.

Depuis plusieurs années, les fonctionnaires, les établissements financiers, les économistes, en un mot tous ceux qu'intéresse le problème de la péréquation des impôts, ressentent le besoin de statistiques comparatives des principales cités et villes du Canada, tout spécialement des statistiques financières municipales. Les municipalités sont placées sous la juridiction provinciale; il fallait donc, tout d'abord, faire cesser la diversité de leurs méthodes de comptabilité et les amener à l'adoption d'un système uniforme. En 1918, le Bureau Fédéral de la Statistique élaborait et soumit aux provinces un projet qui proposait un système de comptabilité et qui établissait la coopération des provinces et du Bureau. Mais l'on dut bientôt admettre que la question était plus complexe qu'on ne l'avait d'abord supposé et que tout changement entraînerait des répercussions imprévues. Il fut donc décidé de recourir à une conférence des fonctionnaires fédéraux et provinciaux, où la question serait examinée sous toutes ses faces et traitée à fond.

Mais en attendant qu'une solution intervienne, on a jugé qu'il était possible de procéder à une investigation limitée, sur les bases suggérées. Un questionnaire fut donc dressé et envoyé aux municipalités dont la population atteint au moins 10,000 habitants; les réponses faites à ce questionnaire ont servi à l'établissement du présent rapport. Le Bureau exprime ici ses remerciements aux fonctionnaires municipaux qui ont rempli ces formules, quelquefois au prix d'un travail ardu, lorsque leur comptabilité ne concorde pas avec le questionnaire. Sans leur bienveillante coopération, il eut été impossible d'obtenir les données nécessaires, même dans un cadre restreint, en raison non seulement des diverses modalités de tenue des livres, mais aussi de la signification différente donnée à certaines expressions, d'une localité à une autre.

Cinquante-trois agglomérations urbaines, comptant 10,000 habitants ou plus, ont participé à notre enquête. Quelques-uns des rapports qui nous ont été envoyés, notamment ceux de Guelph, de Moncton et de St. Catharines n'étaient pas suffisamment détaillés pour servir à nos fins; ils ont dû être laissés de côté. D'autre part, les municipalités, de Chatham, Ont., Shawinigan Falls, P.Q., et Glace Bay, N.-É., ont négligé de nous fournir les informations demandées.

Les données recueillies ont été groupées dans une série de huit tableaux, dont on trouvera l'énumération à la table des matières.

Nous répétons que le présent rapport est nécessairement imparfait; il démontre, toutefois, la possibilité d'établir des statistiques municipales, comparables de ville à ville, lorsqu'un accord définitif aura été conclu entre les intéressés. L'expérience déjà acquise permettra certaines additions aux formules, notamment dans la classification de la partie financière. Si l'utilité de cette tentative est démontrée, le Bureau la renouvellera et en élargira le cadre, de manière à embrasser un plus grand nombre de municipalités.

Ce rapport est l'œuvre du lt.-col. J. R. Munro, chef de la Division des Finances de ce Bureau.

R. H. COATS,
Statisticien du Dominion.

NOTE.

Le manque d'espace n'a pas permis de placer à la tête des tableaux la traduction française des titres et des sous-titres. Toutefois, afin de faciliter l'étude de ce rapport par ceux qui ne sont pas familiers avec la langue anglaise, la table des matières en français contient plus de détails que la version anglaise et constitue une traduction littérale des titres et sous-titres des tableaux, dans l'ordre exact où ils sont imprimés dans le texte anglais.

À la suite de la table des matières on a placé une traduction des renvois au bas des pages, qui se trouvent dans le texte anglais, avec indication de la page et du numéro de chaque renvoi.

Afin de permettre la comparaison entre les cités et les villes de population à peu près semblable, ou les a divisées en plusieurs groupes, ainsi composés.

GROUPÉ I.—Cités dont la population atteint ou dépasse 100,000 habitants.

GROUPÉ II.—Cités ayant une population de 50,000 à 100,000 habitants.

GROUPÉ III.—Cités ayant une population de 25,000 à 50,000 habitants.

GROUPÉ IV.—Cités ayant une population de 10,000 à 25,000 habitants.

Dans le tableau 3, pages 13 et 15, la huitième colonne est consacrée à la méthode employée pour la purification de l'eau des aqueducs. Nous donnons ci-dessous les termes dont on s'est servi dans le texte anglais avec leur traduction en regard:

ANGLAIS.

FRANÇAIS.

Double filtration.....	Double filtration.
Slow sand and drifting sand.....	Filtres rapides et filtres lents par le sable.
None.....	Aucune.
Chloramine.....	Acide chlorique.
Coagulation.....	Coagulation.
Gravity filter.....	Filtre automatique.
Hypochloride.....	Hypochlorite.
Natural sand and gravel filter.....	Filtration naturelle par le sable et le gravier.
Chlorinated.....	Au chlore.
Filtration with Alum.....	Filtration par l'alun.
Mechanical Chlorine.....	Au chlore mécaniquement.
Sedimentation and filtration.....	Sédimentation et filtration.
Chlorine.....	Chlore.
Natural filter through sand.....	Filtration naturelle par le sable.
Chlorine gas.....	Chlore gazeux.
Natural filtration through sand into infiltration galleries.....	Filtration naturelle dans des galeries de sable.
Liquid Chlorine.....	Chlore liquide.
Mechanical filters, small part.....	Filtres mécaniques (petite partie).
Aeration and sterilization.....	Aération et stérilisation.
Chlorination, coagulation, aeration and filtration.....	Chlore, coagulation, aération et filtration.
Sedimentation basin Chlorination Automatic.....	Bassin de sédimentation, chlorination automatique.
Pressure filters.....	Filtres à pression.
Automatic filters.....	Filtres automatiques.
Automatic Chlorine.....	Automatiquement, par le chlore.
Mechanical and sand filter.....	Filtre mécanique et sable filtrant.
Slow sand filtration.....	Filtration lente par sable.
Filters.....	Filtres.
Gravity filter.....	Filtre automatique.

STATISTICS OF URBAN MUNICIPALITIES HAVING A POPULATION OF 10,000 AND OVER

1920

PREFACE

In 1920 the Bureau undertook a statistical survey of the urban municipalities throughout Canada having a population of 10,000 and over. The report, though regarded as tentative, proved of much interest, and the edition was quickly exhausted. Subsequently the Bureau published reports dealing respectively with towns of 3,000 to 10,000 population, and with towns and incorporated villages having a population of 1,000 to 3,000.

A second survey of the larger urban centres is herewith presented. It has not been considered necessary to republish the statistics concerning street pavements, lighting systems, water supply systems, purification plants and fire and police department equipment, but in the financial tables, showing receipts, expenditures and assets, a number of additions have been made, and the present report is therefore more complete than its predecessor. The Bureau again tenders its thanks to the municipal officers who so kindly aided in the survey.

The returns as furnished by municipal officials for 1919 and published in previous reports of the Bureau showed that 61 urban municipalities estimated their population to be 10,000 or over. Of this number, Guelph, Glace Bay and Shawinigan Falls failed to report for 1920, while the return for Valleyfield showed it to have less than 10,000 population. This gives a net total of 57 municipalities recorded. Included for comparative purposes in this number are the returns for Amherst, Dartmouth and New Glasgow in Nova Scotia and Oshawa and North Bay in Ontario whose officials claimed a population of over 10,000, though the returns of the Census of 1921 just completed, show that each had somewhat less.

The report has been compiled under the direction of Colonel J. R. Munro, Chief of the Finance Statistics Branch.

R. H. COATS,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, September 1, 1922.

STATISTIQUES DES MUNICIPALITÉS URBAINES DE 10,000 ÂMES ET PLUS

1920

PRÉFACE

En 1920, le Bureau entreprit une investigation statistique des municipalités urbaines du Canada dont la population atteignait ou dépassait 10,000 habitants. Les résultats de cette enquête furent condensés dans un rapport jugé fort intéressant et dont l'édition fut rapidement épuisée. Subséquemment, le Bureau publia des statistiques similaires, consacrées respectivement aux villes d'une population de 3,000 à 10,000 habitants et aux villes et villages incorporés de 1,000 à 3,000 habitants.

Nous présentons ici, pour la seconde fois, les données se rapportant aux agglomérations urbaines les plus importantes. On a jugé inutile de répéter ce qui a déjà été dit au sujet des pavages des rues, de l'éclairage, des adductions d'eau et de sa purification, du matériel d'incendie et policier mais, par contre, en certain nombre d'additions ont été faites aux tableaux d'ordre financier relatant les recettes, les dépenses et l'actif, de telle sorte que le présent rapport est plus complet que son prédécesseur. Le Bureau offre ses sincères remerciements aux fonctionnaires municipaux qui ont participé à la préparation de ce travail.

Les informations fournies par les fonctionnaires municipaux pour l'année 1919, et qui ont fait l'objet de rapports antérieurs, indiquaient que 16 municipalités urbaines estimaient leur population à 10,000 habitants ou plus. Parmi elles, Guelph, Glace Bay et Shawinigan Falls ont négligé de faire parvenir leurs rapports pour 1920; d'autre part, la population de la ville de Valleyfield est inférieure à 10,000 habitants; il reste donc un total de 57 municipalités comprises dans ce rapport. Dans ce nombre figurent les villes d'Amherst, Dartmouth et New Glasgow, en Nouvelle-Ecosse, d'Oshawa et North Bay dans l'Ontario, qui se sont placées dans cette catégorie, quoique les résultats du recensement de 1921 démontrent que leur population est quelque peu inférieure à 10,000 habitants.

Le rapport a été compilé sous la direction du colonel J. R. Munro, chef de la section des statistiques financières.

R. H. COATS,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, 1er septembre 1922.

COMPARATIVE SUMMARY

The total assessed value of taxable property in cities of 10,000 and over in Canada for 1920 was \$2,786,894,948, while in 1919 it was \$2,924,553,003. The figures however are not comparable as in 1919 several municipalities were unable to separate business assessment but included it in the assessed value of taxable property. The total value of taxable property was \$280,294,473, in towns of 3,000 to 10,000, and \$227,073,141 in the towns of 1,000 to 3,000.

The assessed per capita values of taxable property, in cities of 10,000 and over by provinces are as follows: Prince Edward Island, \$466.72, Nova Scotia \$677.10, New Brunswick \$668.04, Quebec \$1,017.68, Ontario \$878.84, Manitoba \$1,284.73, Saskatchewan \$1,106.34. Alberta \$1,240.75, British Columbia \$1,280.17. The cities in the provinces east of Manitoba, had an assessed value of taxable property of \$914.53 per capita as compared with \$1,249.34 per capita for the provinces west of Ontario. In 1919 the per capita assessed value was \$907.10 for the Eastern group, compared with \$1,238.58 for the Western. Towns of 3,000 to 10,000 showed a per capita value of \$455.12 for Eastern provinces as against \$784.84 for the Western group in 1919 while the towns of 1,000 to 3,000 showed \$503.12 per capita for the Eastern provinces as compared with \$666.40 for the western in 1920.

In connection with receipts, "compulsory taxation" consisting of taxation for general purposes, arrears, school taxes, poll tax, income tax and other special taxation, showed a total for all cities in 1920 of \$94,407,641.31 and a per capita revenue of \$33.39, while in 1919 taxation receipts amounted to \$81,436,969.93 or \$27.34 per capita. Receipts were \$16.97 per capita for towns of 3,000 to 10,000 in 1919 and \$17.60 per capita for the towns of 1,000 to 3,000 in 1920.

Taking the provinces separately, taxation receipts for the cities amounted to \$118,858.19 in Prince Edward Island, \$1,677,441.16 in Nova Scotia, \$2,007,127.41 in New Brunswick, \$22,345,510.74 in Quebec, \$40,742,820.99 in Ontario, \$7,117,370.60 in Manitoba, \$3,941,951.44 in Saskatchewan, \$8,611,210.45 in Alberta and \$7,845,350.33 in British Columbia, with per capita revenues respectively of \$9.63 in Prince Edward Island, \$15.56 in Nova Scotia, \$27.58 in New Brunswick, \$25.50 in Quebec: \$35.17 in Ontario, \$34.33 in Manitoba \$49.61 in Saskatchewan, \$60.28 in Alberta and \$46.03 in British Columbia.

The total ordinary receipts for cities in 1920 amounted to \$168,840,791.90 while the extraordinary revenue was \$41,679,648.02, showing a per capita revenue of \$59.71 for ordinary receipts and \$14.74 for extraordinary. In 1919 the total ordinary receipts for cities were \$135,476,954.94, with extraordinary receipts of \$52,288,251.29, ordinary per capita revenue being \$45.48, and extraordinary \$17.55. Corresponding figures for the towns of 3,000 to 10,000 showed total ordinary receipts of \$15,309,561.63, being \$27.70 per capita, while extraordinary receipts were \$4,476,454.13 or \$8.10 per capita. The ordinary receipt for towns of 1,000 to 3,000 amounted to \$10,684,794.60, while the extraordinary revenue was \$5,448,828.55, showing a per capita revenue of \$25.49 for ordinary receipts and \$13.00 for extraordinary.

A study of the expenditure statements shows that the total ordinary expenditure for the cities in 1920 amounted to \$170,883,853.71 while the extraordinary expenditure was \$39,808,405.44 a per capita expenditure of \$60.4 for ordinary and \$11.08 for extraordinary. In 1919 the total ordinary expenditure for cities was \$128,273,644.36, while the extraordinary expenditure was

\$53,653,888.55, being \$43.06 per capita ordinary, and \$18.01 extraordinary. Similar statistics for the towns of 3,000 to 10,000 show total ordinary expenditure of \$15,185,024.08, total extraordinary \$5,209,136.78, with per capita expenditure of \$27.48 and \$9.43 respectively. The total ordinary expenditure for the towns of 1,000 to 3,000 was \$11,318,445.73, while the extraordinary expenditure was \$4,848,881.53, being \$27.00 per capita ordinary and \$11.57 extraordinary.

In the previous reports only available assets were shown, whereas in this report a full statement of all assets is given. The total assets of the cities for 1920 amounted to \$809,861,298.54, showing a per capita value of \$286.40.

The liabilities of the cities in 1920 amounted to \$675,610,500.63 showing a per capita indebtedness of \$238.93, while in 1919 the total liabilities were \$603,039,036.92 or \$202.44 per capita. The towns of 3,000 to 10,000 showed total liabilities of \$55,719,411.43, or a per capita indebtedness of \$100.82, while the towns of 1,000 to 3,000 had total liabilities of \$33,407,404.64, or a per capita debt of \$79.69. *ve*

RÉSUMÉ

La valeur estimative des propriétés taxables, dans les cités canadiennes de 10,000 habitants et plus, s'élevait, en 1920, à \$2,786,894.948, tandis qu'en 1919 elle atteignait \$2,924,553,003. Toutefois, ces chiffres ne sont pas strictement comparables car, en 1919, plusieurs municipalités au lieu d'indiquer séparément les évaluations relatives à la taxe d'affaires, les avaient englobées dans la valeur des propriétés taxables. Dans les villes de 3,000 à 10,000 habitants les propriétés de cette nature sont évaluées à \$280,294,473 et, dans les villes de 1,000 à 3,000 habitants, à \$227,073,141.

Cette même valeur per capita, dans les cités d'une population de 10,000 habitants au moins, fut établie ainsi qu'il suit dans les provinces: Ile du Prince-Edouard \$466.72, Nouvelle-Ecosse \$677.10, Nouveau-Brunswick \$668.04, Québec \$1,017.68, Ontario \$878.84, Manitoba \$1,284.73, Saskatchewan \$1,106.34; Alberta \$1,240.75, Colombie Britannique \$1,280.17. Les cités du groupe des provinces sises à l'est du Manitoba possèdent des immeubles sujets à la taxe d'une valeur per capita de \$914.53, au lieu de \$1,249.34 per capita pour les provinces situées à l'ouest d'Ontario. En 1909, cette valeur était de \$907.10 pour le groupe oriental, comparativement à \$1,238.58 pour le groupe occidental. Les villes de 3,000 à 10,000 habitants donnèrent, en 1919, une valeur per capita de \$455.12 pour les provinces de l'est, contre \$784.84 pour les provinces de l'ouest; enfin, en 1920, dans les villes et villages de 1,000 à 3,000 habitants, on trouvait une valeur per capita de \$503.12 dans les provinces de l'est, comparativement à \$666.40 pour les provinces de l'ouest.

Abordant le chapitre des recettes nous trouvons que la "taxe obligatoire", qui embrasse la taxe foncière et ses arrérages, la taxe scolaire, la taxe de capitation, la taxe sur le revenu et d'autres taxes spéciales, a produit en 1920, dans toutes les cités, une somme de \$94,407,641.31, soit un revenu per capita de \$33.39, tandis qu'en 1919, les recettes provenant des mêmes sources s'étaient limitées à \$81,436,969.93 ou \$27.34 per capita. Dans les villes de 3,000 à 10,000 habitants, les mêmes recettes ont donné en 1919 une moyenne de \$16.97 per capita et en 1920, dans les villes et villages de 1,000 à 3,000 habitants, de \$17.60 per capita.

Si l'on considère les provinces séparément, on voit que les taxes encaissées par les cités de l'île du Prince-Edouard représentaient \$118,858.19; de la Nouvelle-Ecosse \$1,677,441; du Nouveau-Brunswick \$2,007,127.41; de Québec \$22,345,510.70; d'Ontario \$40,742,820.99; du Manitoba \$7,117,370.60; de la Saskatchewan \$3,941,951.44; de l'Alberta \$8,611,210.45 et de la Colombie Britannique \$7,845,350.33, ce qui porte les revenus per capita à: \$9.63 dans l'île du Prince-Edouard, \$15.56 dans la Nouvelle-Ecosse, \$27.58 dans le Nouveau-Brunswick, \$25.50 dans Québec; \$35.17 dans Ontario; \$34.33 au Manitoba; \$49.61 dans la Saskatchewan; \$60.28 dans l'Alberta et \$46.03 dans la Colombie Britannique.

En 1920, les recettes ordinaires des cités formaient un total de \$168,840,791.50 tandis que leurs revenus extraordinaires représentaient \$41,679,648.02, soit un revenu per capita de \$59.71 pour les recettes ordinaires et \$14.74 pour les recettes extraordinaires. En 1919, les recettes ordinaires des cités n'avaient pas dépassé \$135,476,954.94, mais les recettes extraordinaires avaient atteint \$52,288,251.29, le revenu ordinaire per capita étant de \$15.48 et le revenu extraordinaire de \$17.55. Les chiffres correspondants, quant aux villes de 3,000 à 10,000 habitants, étaient les suivants: recettes ordinaires \$15,309,561.63 ou \$27.70 per capita, recettes extraordinaires \$4,476,454.13 ou \$8.10 per capita.

Enfin, les recettes ordinaires des villes et villages de 1,000 à 3,000 habitants donnaient \$10,684,794.60 et leurs recettes extraordinaires \$5,448,828.55, soit, per capita, \$25.49 pour les recettes ordinaires et \$13.00 pour les recettes extraordinaires.

Une analyse des colonnes réservées aux dépenses montre qu'en 1920, les dépenses ordinaires des cités s'élevaient à \$170,883,853.71 et les dépenses extraordinaires à \$39,808,405.44, soit \$60.43 per capita pour les dépenses ordinaires et \$14.08 pour les dépenses extraordinaires. En 1919, les dépenses ordinaires des cités n'avaient pas dépassé \$128,273,644.36, mais leurs dépenses extraordinaires avaient atteint \$53,653,888.55, soit \$43.06 per capita pour les dépenses ordinaires et \$18.01 pour les dépenses extraordinaires. Les statistiques similaires des villes de 3,000 à 10,000 habitants portent leurs dépenses ordinaires à \$15,185,024.08 et leurs dépenses extraordinaires à \$5,209,136.78, soit une dépense per capita de \$27.48 et \$9.43 respectivement. Quant aux villes de 1,000 à 3,000 habitants, leurs dépenses ordinaires ont été de \$11,318,445.73 et celles extraordinaires de \$4,848,881.53, soit \$27.00 per capita pour les dépenses ordinaires et \$11.57 pour les dépenses extraordinaires.

Les rapports précédents se bornaient à indiquer l'actif disponible, tandis que ce rapport présente un inventaire complet de la totalité de l'actif. En 1920, la totalité de l'actif des cités formait une somme de \$809,861,298.54, soit une valeur per capita de \$286.40.

D'autre part, en la même année 1920, le passif des cités était représenté par \$675,510,500.63, soit une dette per capita de \$238.93; en 1919, ce passif était de \$603,039,036.92 ou \$202.44 per capita. Le passif des villes de 3,000 à 10,000 habitants vient s'y ajouter pour \$55,709,411.43, soit \$100.82 per capita et celui des villes et villages de 1,000 à 3,000 habitants pour \$33,497,404.64, soit une dette per capita de \$79.69.

Urban Municipalities of 10,000 Population and over

P R E F A C E

The Bureau of Statistics published special reports for the year 1922 dealing with urban municipalities having a population of 1,000 and over. The information was obtained by sending a special schedule to the various municipal officers concerned. Considerable difficulty was encountered in procuring data as frequently printed financial reports were sent to the Bureau with a suggestion that the information might be compiled from them, but the divergent methods of presenting financial statements as between municipalities, the inclusion of financial returns for public services, such as street railways, light and power services, waterworks, school or educational boards, made it impossible to co-ordinate statements.

Some provinces collect and publish very useful statistics while others issue only incomplete reports.

The present bulletin which deals with the cities and towns having a population of 10,000 and over has been compiled from the latest available provincial reports on municipalities and treats more specifically with financial activities. No attempt has been made to draw comparisons, owing to the lack of uniformity in compilation already mentioned.

The following notes will assist in a clearer understanding of the tables.

The Provincial Governments of Prince Edward Island and New Brunswick do not publish municipal statistics. The information for municipalities in those provinces was compiled from civic annual reports.

In Quebec the assets table includes under "Real Property" the value of moveable and immoveable property. The details of assets for public utilities have been added in this bulletin to the total of general assets as given in the provincial report.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charge." This Bulletin includes receipts and expenditures of waterworks and gas plants which were not included in the general statements of the provincial report. The only details of assets available are for sinking funds and public utilities, while debenture debt alone is detailed for liabilities.

Manitoba records neither receipts nor expenditures, while for assets only arrears of taxes are shown. For liabilities only debenture debt is shown.

In Saskatchewan municipalities general expenditure on "public utilities" includes their debenture charges.

Alberta's municipal expenditure on Public Utilities includes their debenture charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

This report has been compiled under the direction of Colonel J. R. Munro, Chief of the Finance Statistics Branch.

R. E. Coats,

Dominion Statistician.

Ottawa, June 7, 1927.

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS
FINANCE STATISTICS BRANCH
OTTAWA - CANADA

Issued March 1928.

STATISTICS OF CITIES IN CANADA, 1926

Dominion Statistician:	R. H. Coats, B.A., F.S.S.(Hon.), F.R.S.C.
Chief, Finance Statistics Branch:	Colonel J. R. Munro

The provincial governments, with the exception of Prince Edward Island and New Brunswick, issue annual reports dealing with municipal statistics of finance. In some instances the financial statements are very completely given, but in a few cases such information is but poorly dealt with. The divergent methods of calculation in financial statements as between municipalities, and the varied forms of presenting financial data as between provincial governments makes it difficult to draw comparisons between individual municipalities, or to make total calculations as between provinces.

Last year the Bureau of Statistics compiled a bulletin from the provincial reports dealing with the financial activities of cities and towns in each province having a reported population of ten thousand and over. In submitting the present bulletin, the Bureau has continued a classification of items which is in uniformity for the years 1925 and 1926. The information is the latest available and the following notes will assist in a clearer understanding of the tables.

There are no organized departments for the direction of municipal affairs in the Provincial Governments of Prince Edward Island and New Brunswick and therefore no departmental statistics are published. The information for municipalities in those provinces was compiled from civic annual reports.

In Quebec the assets table includes under "Real Property" the value of movable and immovable property. The details of assets for public utilities have been added in this bulletin to the total of general assets as given in the provincial reports.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges." This bulletin includes receipts and expenditures of waterworks and gas plants which were not included in the general statements of the provincial report. The only details of assets available are for sinking funds and public utilities, while debenture debt alone is detailed for liabilities.

Manitoba records neither receipts nor expenditures, while for assets only arrears of taxes are shown. For liabilities only debenture debt is shown.

In Saskatchewan general expenditure on "public utilities" includes their debenture charges.

Alberta's municipal expenditure on Public Utilities includes their debenture charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

DOMINION BUREAU OF STATISTICS
FINANCE STATISTICS BRANCH
OTTAWA - CANADA

Issued April. 1929.

STATISTICS OF CITIES IN CANADA, 1927.

Dominion Statistician;	E. H. Coats, B.A., F.S.S.(Hon.), F.R.S.C.
Chief, Finance Statistics Branch;	Colonel J. R. Munro

Annual reports dealing with municipal statistics of finance are issued by each of the provincial governments with the exception of Prince Edward Island and New Brunswick, in which there are no organized departments for the direction of municipal affairs. In some instances the financial statements are very completely given, but in a few cases such information is but poorly dealt with. The divergent methods of calculation in financial statements as between municipalities, and the varied forms of presenting financial data as between provincial governments make it difficult to draw comparisons between individual municipalities, or to make total calculations as between provinces.

The Bureau of Statistics compiled bulletins from the provincial reports showing the principal financial activities of cities and towns of each province having a reported population of ten thousand and over for the years 1925 and 1926. The present bulletin giving statistics for 1927 continues the classification of items adapted in the previous reports and to assist in a clearer understanding of the tables the following notes are submitted.

For the Provinces of Prince Edward Island and New Brunswick information was obtained direct from civic officials.

In Quebec the assets table includes under "Real Property" the value of movable and immovable property. The details of assets for public utilities have been added in this bulletin to the total of general assets as given in the provincial reports.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges." This bulletin includes receipts and expenditures of waterworks and gas plants which were not included in the general statements of the provincial report. The only details of assets available are for sinking funds and public utilities while debenture debt alone is detailed for liabilities.

Manitoba records neither receipts nor expenditures, while for assets only arrears of taxes are shown. For liabilities only debenture debt is shown.

In Saskatchewan general expenditure on "public utilities" includes their debenture charges.

Alberta's municipal expenditure on Public Utilities includes their debenture charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

DOMINION BUREAU OF STATISTICS
FINANCE STATISTICS BRANCH
OTTAWA - CANADA

STATISTICS OF CITIES IN CANADA, 1928.

Dominion Statistician:	R.H. Coats, B.A., F.S.S.(Hon.), F.R.S.C.
Chief, Finance Statistics Branch:	Colonel J.R. Munro.

In each of the provinces, with the exception of Prince Edward Island and New Brunswick, there are organized departments for the direction of municipal affairs. The annual reports of some of these provincial departments give a fairly complete history of the financial activities of the municipalities coming under their control, while in others such information is but poorly dealt with. Under such circumstances it is rather difficult to obtain comparable data in making calculations as between provinces. The Bureau of Statistics, therefore, compiles annually a bulletin showing the principal financial activities of the larger urban municipalities of each province, the statistics of which are obtained from the reports above mentioned.

In presenting the bulletin for 1928, the same classification of items adopted in previous reports is maintained. The following notes will assist in a clearer understanding of the tables submitted.

For the Provinces of Prince Edward Island and New Brunswick information was obtained direct from civic officials.

In Quebec the assets table includes under "Real Property" the value of movable and immovable property.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges." The only details of assets available are for sinking funds and public utilities while debenture debt alone is detailed for liabilities.

This bulletin includes receipts and expenditures of waterworks and gas plants which were not included in the general statements of the provincial reports of Ontario, Saskatchewan and Alberta.

Manitoba records neither receipts nor expenditures, while for assets only arrears of taxes are shown. For liabilities only debenture debt is shown.

In Saskatchewan general expenditure on "Public Utilities" includes their debenture charges.

Alberta's municipal expenditure on "Public Utilities" includes their debenture charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician: R. H. Coats, B.A., F.S.S. (Hon.), F.R.S.C.
Chief, Finance Statistics Branch: Colonel J. R. Munro.

STATISTICS OF CITIES IN CANADA, 1929.

In each of the provinces, with the exception of Prince Edward Island and New Brunswick, there are organized departments for the direction of municipal affairs. The annual reports of some of these provincial departments give a fairly complete history of the financial activities of the municipalities coming under their control, while in others such information is but poorly dealt with. Under such circumstances it is rather difficult to obtain comparable data in making comparisons as between provinces. The Bureau of Statistics, therefore, compiles annually a bulletin showing the principal financial activities of the larger urban municipalities of each province, the statistics of which are obtained from the reports above mentioned.

In presenting the bulletin for 1929, the same classification of items adopted in previous reports is maintained. The following notes will assist in clearer understanding of the tables submitted.

For the Provinces of Prince Edward Island and New Brunswick information was obtained direct from civic officials.

In Quebec, the assets table includes under "Real Property" the value of movable and immovable property. The statistics for the municipalities of Quebec are for the calendar year 1929 excepting Quebec city whose fiscal year ended April 30th, 1930; Hull, April 30th 1929; Outremont and Westmount, October 31st 1929; Sherbrooke, June 30th, 1930, and Levis December 31st, 1929.

In Ontario, debenture expenditure in Table 3 represents "Municipal Charges." The only details of assets available are for sinking funds and public utilities while debenture debt alone is detailed for liabilities.

This bulletin includes receipts and expenditures for waterworks, street railways, and gas plants which were not included in the general statements of the provincial reports of Ontario, Saskatchewan and Alberta.

Manitoba records neither receipts nor expenditures, while for Ontario only arrears of taxes are shown. For liabilities only debenture debt is shown.

In Saskatchewan general expenditure on "Public Utilities" includes their fixed charges.

Alberta's municipal expenditure on "Public Utilities" includes their fixed charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all items nor do they show the total asset valuations.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician:	R. H. Coats, B.A., F.S.S. (Hon.), F.R.S.C.
Chief, Finance Statistics Branch:	Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER 1930.

Shortly after the organization of the Dominion Bureau of Statistics in 1913 efforts were made to bring about a coordinated system of reporting municipal statistics throughout Canada. While organized departments for the direction of municipal affairs existed in most of the provinces the methods of presenting statistical facts concerning municipal life were very diverse and allowed of no comparability.

The Bureau prepared a lengthy memorandum on the subject and in consultation with suggestions by the Union of Canadian Municipalities and Bankers' and Investment Brokers' Associations drew up a memorandum with tentative schedules for reporting by the various classes of municipalities which would be strictly comparable. This memorandum was submitted to the provincial authorities concerned suggesting a range of views on the subject and offering the services and the machinery of the Bureau as a clearing house for the benefit of all concerned. The scheme met with general approval but no definite action was taken. The Bureau then sent the schedules to certain classes of municipalities as an experiment and the success of the scheme was demonstrated by the publication of reports between the years 1920-1923.

Pending the development of uniform methods of accounting and reporting municipal statistics, the Bureau has prepared annually a bulletin dealing with the financial activities of the larger urban municipalities of each province, the statistics of which are obtained from reports issued by provincial governments. The report now being presented, covers the activities for the year 1930 and the following notes will assist in the better understanding of the tables submitted.

For the Provinces of Prince Edward Island and New Brunswick information was obtained direct from civic officials. The latest available statistics for the city of Moncton are for 1929.

In Quebec, the assets table includes under "Real Property" the value of real estate, furniture and investment. The statistics for the municipalities of Quebec are for the calendar year 1930 excepting, Quebec city whose fiscal year ended April 30th, 1931; Hull, April 30th, 1930; Outremont October 31st, 1930 and Shawinigan Falls, June 30th, 1930.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges." The only details of assets available are for sinking funds and public utilities while debenture debt alone is detailed for liabilities.

This bulletin includes receipts and expenditures for water-works, street railways, and gas plants which were not included in the general statements of the provincial reports of Ontario, Saskatchewan and Alberta.

Manitoba records neither receipts nor expenditures, while for assets only arrears of taxes are shown. For liabilities only debenture debt is shown.

Alberta's municipal expenditure on "Public Utilities" includes their fixed charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician: R. H. Coats, B.A., F.S.S.(Hon.), F.R.S.C.
Chief, Finance Statistics Branch: Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER, 1931.

Pending the development of uniform methods of accounting and reporting municipal statistics, the Bureau submits its annual bulletin dealing with the financial activities of the larger urban municipalities of each province, the statistics of which are obtained from reports issued by provincial governments. The report herewith presented, covers the activities for the year 1931 and the following notes will assist in the better understanding of the tables submitted.

For the Provinces of Prince Edward Island and New Brunswick information was obtained direct from civic officials.

In Quebec, the exempted property valuation as shown in Table 1 includes taxable property temporarily exempted amounting to \$50,281,607 for all the cities shown. The assets table includes under "Real Property" the value of real estate, furniture and investment. The statistics for the municipalities of Quebec are for the calendar year 1931 excepting Quebec city and Levis, whose fiscal year ended April 30th, 1932; Hull, April 30th, 1931; Outremont, October 31st, 1931 and Shawinigan Falls, June 30th, 1931.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges." The only details of assets available are for sinking funds and public utilities while debenture debt alone is detailed for liabilities.

In the provincial reports of Alberta, Ontario and Saskatchewan the receipts and expenditures for water-works, street railways and gas plants are not included with other general accounts. In this bulletin such receipts and expenditures have been included.

Manitoba records neither receipts nor expenditures, while for assets only arrears of taxes, sinking funds and investments are shown. For liabilities only debenture debt is shown.

Alberta's municipal expenditure on "Public Utilities" includes their fixed charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

The populations, as shown by the Dominion Census of 1931, are given for the municipalities in each province with the exception of Ontario and Quebec where municipal estimates differ from the census returns. For the cities of Montreal and Toronto the actual census figures have been substituted for the municipal estimates.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician:	R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Finance Statistics Branch:	Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER, 1932.

Pending definite arrangements for uniformity in reporting municipal statistics, the Bureau submits the present bulletin which deals with financial activities of the larger urban municipalities in each province for the year 1932. The information has been compiled principally from reports issued by provincial governments.

Owing to the varied methods of municipal accounting as between provinces the following notes are submitted and will assist in the better understanding of the tables.

For the provinces of Prince Edward Island and New Brunswick information was obtained direct from civic officials.

In Quebec, the exempted property valuation, as shown in Table 1, includes taxable property temporarily exempted amounting to \$57,540,812 for all the cities shown. The assets table includes under "Real Property" the value of real estate, furniture and investment. The statistics for the municipalities of Quebec are for the calendar year 1932 excepting, Quebec city and Levis, whose fiscal years ended April 30th, 1933; Hull, April 30th, 1932; Outremont, October 31st, 1932; Shawinigan Falls, June 30th, 1932 and Thetford Mines, November 30th, 1932.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges". The only details of assets available are for sinking funds and public utilities, while debenture debt alone is detailed for liabilities.

In the provincial reports of Alberta, Ontario and Saskatchewan, the receipts and expenditures for water works, street railways and gas plants are not included with other general accounts. In this bulletin such receipts and expenditures have been included.

Manitoba does not record expenditures, and the only receipts shown are tax collections. Arrears of taxes, sinking funds and investments, are recorded for assets and for liabilities only debenture debt is given.

Alberta's municipal expenditure on "Public Utilities" includes their fixed charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

The populations given are estimates used by the provincial governments in their municipal reports, with the exception of six cities noted, for which places the Dominion of Canada census populations for 1931 have been employed.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician,
Chief, Finance Statistics Branch:

R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER, 1933.

The following bulletin presents the principal financial activities of the larger urban municipalities in each province for the year 1933. The information has been compiled from reports made by municipalities to their respective provincial governments.

In most provinces there is an organized department which has a certain control and regulation of municipal affairs and annual statements are published but there is no uniformity as between provinces in the arrangement of their statistics. The Bureau has consulted with provincial officials where discrepancies appeared to exist and the following notes are submitted to assist in the better understanding of the tables presented.

The provincial governments of Prince Edward Island and New Brunswick did not publish any information concerning the cities within their respective areas and the data contained in this report was obtained directly from civic officials.

In Quebec, the exempted property valuation as shown in Table 1, includes taxable property temporarily exempted amounting to \$54,808,961 for all the cities shown. The assets table includes under "Real Property" the value of real estate, furniture and investment. The general statistics for the municipalities of Quebec are for the calendar year 1933 with the following exceptions: Quebec City and Levis whose fiscal years ended April 30th, 1934; Montreal, whose returns are for sixteen months ending April 30th, 1934; Hull, whose fiscal year ended April 30th, 1933; Shawinigan Falls on June 30th, 1933, and Thetford Mines on November 30th, 1933. School statistics are for the fiscal year ended June 30th, 1933.

In Ontario, debenture expenditure in Table 3 represents "Municipal Debt Charges". The only details of assets available are for sinking funds and public utilities, while debenture debt alone is detailed for liabilities.

In the provincial reports of Alberta and Ontario, the receipts and expenditures for water-works, street railways and gas plants are not included with other general accounts. In this bulletin such receipts and expenditures have been included.

Manitoba does not record expenditures, and the only receipts shown are tax collections.

Alberta's municipal expenditure on "Public Utilities" includes their fixed charges. Under assets, sinking funds only are available.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

The populations given are estimates used by the provincial governments in their municipal reports, with the exception of five cities noted, for which places the Dominion of Canada census populations for 1931 have been employed.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician:
Chief, Finance Statistics Branch:

R. H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.)
Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER, 1934.

For some years past the Bureau has compiled a bulletin dealing with the financial activities of cities and towns in Canada having a population of 10,000 and over. The information has been taken from reports made by the several municipalities to their respective provincial governments. It has been found, however, that there is no uniformity in the arrangement of statistics as between provinces which makes it difficult to obtain accurate statements for comparative purposes.

The provincial governments of Prince Edward Island and New Brunswick do not publish any information concerning cities within their respective areas and the data contained in this report was obtained direct from civic officials.

The reports on municipal statistics for both the provinces of Quebec and Ontario in 1934 have been subjected to considerable modification as compared with those of previous years. The introduction of the reports of each of the provinces draws attention to the incomparability of 1934 statements with those published for earlier years. In the Ontario report the only receipts shown are those for Tax Collections, Tax Arrears and Water-works Systems, while the figures giving the distribution of general administrative expenditures other than those on waterworks systems have been suspended entirely pending a revision of the system of reporting. With regard to assets the report only furnishes statistics for waterworks systems, arrears of taxes and sinking fund investments. Pending the resumption of the more fully detailed tables by the Department of Municipal Affairs of Ontario it was thought advisable to insert statistics showing revenues, expenditures, assets and liabilities in part, for electric light, power, telephone and street railway systems of the cities of Ontario, dealt with in this report. The Statistics given are those compiled by the Transportation and Public Utilities Branch of this Bureau.

In Quebec, the exempted property valuation as shown in Table 1, includes taxable property temporarily exempted amounting to \$43,624,627 for all the cities shown. The general statistics for the municipalities of Quebec are for the calendar year 1934 with the following exceptions: Montreal, Quebec City and Levis whose fiscal years ended April 30, 1935; Hull, whose fiscal year ended April 30, 1934; Shawinigan Falls on June 30, 1934, and Thetford Mines on November 30, 1934. School statistics are for the fiscal year ended June 30, 1934.

In the provincial report of Alberta the receipts and expenditures for waterworks, street railways and gas plants are not included with other general accounts. In this bulletin such receipts and expenditures have been included. Alberta's municipal expenditure on "Public Utilities" includes their fixed charges. Under assets, sinking funds only are available.

Manitoba does not record expenditures, and the only receipts shown are tax collections.

In British Columbia, the municipal reports do not detail all assets nor do they show the total asset valuations.

The populations given are estimates used by the provincial governments in their municipal reports, with the exception of four cities noted, for which places the Dominion of Canada census populations for 1931 have been employed.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician:	R. H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.)
Chief, Finance Statistics Branch:	Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER, 1935.

In order to obtain greater uniformity in presentation of Municipal Statistics throughout Canada, a conference was held in the Dominion Bureau of Statistics at which representatives from the Departments of Municipal Affairs of the several provinces were present. Continuing committees are now at work drawing up schedules and terminology of accounts for final adoption next year. In the meantime, the Bureau has continued its annual compilation dealing with the financial activities of Cities and Towns in Canada having a population of 10,000 and over. The information has been taken from reports made by the several municipalities to their respective Provincial Governments, with the exception of the cities of Charlottetown, Saint John and Moncton, and represents the latest available statistics which it is possible to obtain under present conditions. With respect to the above-mentioned cities, the data was obtained directly from municipal officials.

During the year 1935 an amalgamation took place of the municipalities of Windsor, East Windsor, Walkerville and Sandwich forming what is now the City of Windsor recorded in this report.

The adoption in 1934, by the Province of Quebec, of the accrual basis in reporting revenues and expenditures has rendered comparability with previous years impossible. This same basis was adopted by the recent conference referred to in the opening paragraph of this report.

The populations given are estimates used by the provincial governments in their municipal reports, with the exception of four cities noted, for which places the Dominion of Canada census populations for 1931 have been employed.

DOMINION BUREAU OF STATISTICS - CANADA
FINANCE STATISTICS BRANCH

Dominion Statistician:	R. H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.)
Chief, Finance Statistics Branch:	Colonel J. R. Munro.

URBAN MUNICIPALITIES 10,000 POPULATION AND OVER, 1936.

In the Bureau's previous report on Urban Municipalities having a population of 10,000 and over, reference was made to the Dominion-Provincial Conference held at Ottawa in 1937 for the purpose of promoting a uniform scheme of reporting financial activities of municipalities throughout Canada. Progress has been made by Continuing Committees but considerable work remains to be done before the adoption of final schedules to complete the aims of the Conference.

With the information presently available to the Bureau from the various Provincial and Civic Reports on municipal finances, the Bureau has again prepared a bulletin giving statistical summaries of Assessment Valuations, Receipts, Expenditures, Assets and Liabilities for the larger urban municipalities.

The statistics as published cover the calendar year period 1936 excepting in the case of a few of the cities in Quebec where a fiscal year period was employed, (Montreal, Quebec, Hull and Levis, April 30, 1936; Shawinigan Falls, June 30, 1936 and Thetford Mines, November 30th, 1936).

The populations given are estimates used by the provincial governments in their municipal reports for 1936, excepting those cities in the provinces of Nova Scotia, Manitoba, Saskatchewan and Alberta, where the latest available Dominion Census figures are employed.

DOMINION BUREAU OF STATISTICS - CANADA

FINANCE STATISTICS BRANCH

Dominion Statisticians:
Chief, Finance Statistics Branch:

R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Colonel J. R. Munro

URBAN MUNICIPALITIES OF 10,000 POPULATION AND OVER, 1937.

The Bureau presents herewith its annual report on statistics of Urban Municipalities having a population of 10,000 and over in each province.

The statistics have been compiled from the departmental reports of provincial governments having control of municipal affairs. The information covers the calendar year period of 1937 with the exception of a few cities in Quebec where the following fiscal year periods have been employed viz. Montreal, Quebec, Hull and Levis, April 30th; Shawinigan Falls, June 30th; and Thetford Mines, November 30th.

The populations shown are estimates used by the provincial governments, with the exception of the cities enumerated in the province of Manitoba, where the latest Dominion Census figures are employed.

In the previous report, reference was made to the Dominion Provincial Conference held at Ottawa in 1937 for the promotion of uniform municipal statistics throughout Canada. Meetings of the sub-committees of the Conference were held from time to time during the year, and preparations for holding another and final conference to implement the recommendations of the several committees have been completed.

In connection with Table 5, the figures of Gross Debenture Debt for Ontario as shown on pages 34 and 35 are subject to the following note:

"A slight departure from previous years has been made in the treatment this year of debenture assumptions by one municipality from another. Where this situation exists, the amount of the assumption is included in the debt of the municipality by which it is assumed, and also is allowed to remain in the total for the debt of the municipality that originally issued the debentures. Explanations indicating this situation are given in the footnotes with respect to both municipalities concerned".

The explanatory footnotes referred to are too voluminous to include in this bulletin but they may be readily obtained from the Provincial Department of Municipal Affairs at Toronto.

Pending the resumption of the more fully detailed tables by the Department of Municipal Affairs of Ontario, it was thought advisable to insert statistics showing revenues, expenditures and assets for electric light, power, telephone and street railway systems of the cities of Ontario, also liabilities in part for street railways for the cities of Toronto, Brantford, Guelph, Kitchener, Fort William and Port Arthur. The statistics shown are those compiled by the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics.

DOMINION BUREAU OF STATISTICS - CANADA

FINANCE STATISTICS BRANCH

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.)
Chief, Finance Statistics Branch: Colonel J. R. Munro

URBAN MUNICIPALITIES OF 10,000 POPULATION AND OVER, 1938.

Arrangements are at present proceeding for holding a further Dominion-Provincial Government Conference with respect to uniform reporting of the financial activities of municipalities throughout Canada. It is hoped that the discussions at this Conference will result in plans which will ensure statistics of greater comparative value than it has been possible to obtain in the past.

In the meantime the Bureau presents a bulletin dealing with the available statistics of urban municipalities having a population of 10,000 and over in each province. The statistics have been compiled from the departmental reports of provincial governments. The information covers the calendar year 1938 with the exception of Saskatchewan, whose fiscal year ends April 30th, 1939, and a few cities in Quebec where the following fiscal year periods have been employed viz: Montreal, Quebec, Hull, Levis and La Tuque, April 30th; Shawinigan Falls, June 30th; and Thetford Mines, November 30th.

The populations shown are estimates used by the Provincial governments, with the exception of the cities enumerated in the province of Manitoba where the latest Dominion Census figures are employed.

With regard to the statistics of Gross Municipal Debenture Debt for Ontario as shown on pages 34 and 35 (Table 5) it would appear that a large number of municipalities in Ontario have assumed part of the debenture debt of other municipalities, either as a result of annexation or detachment of certain areas from one municipality to the other, or as a result of the formation of union school sections under the Public School Act. Explanations of these are contained in the footnotes of the Ontario Report, but are too voluminous to include in this bulletin. Further information on this point may be obtained from the Department of Municipal Affairs, Toronto.

Pending the resumption of the more fully detailed tables by the Department of Municipal Affairs of Ontario, it was thought advisable to insert statistics showing revenues, expenditures and assets for electric light and power, telephone and street railway systems of the cities of Ontario, also liabilities in part for street railways for the cities of Toronto, Windsor, Brantford, Guelph, Kitchener, Fort William and Port Arthur. The statistics shown are those compiled by the Transportation and Public Utilities Branch of the Dominion Bureau of Statistics.
